

## Logos Acquires EBS Digital – Creating a Nordic Powerhouse in Unattended Payments

Logos Payment Solutions is proud to announce the acquisition of **EBS Digital**, the market leader in unattended payment terminals in Norway and Finland.

This strategic acquisition marks a major milestone in Logos' ambition to become the **undisputed Nordic powerhouse in unattended payments**. By bringing together Logos' premium, high-performance solutions with EBS Digital's cost-efficient and widely adopted platforms, the combined company now offers one of the most complete and competitive portfolios in the market.

*“EBS Digital has done an amazing job building market leadership in Norway and Finland with the Nayax platform,”* says Casper Bøyesen-Laugen, CEO of Logos. *“Nayax is a good fit for applications like vending, access, arcades, and many other use cases where compatibility, simplicity, and scalability are key. The list of supported machines is constantly growing – making it an obvious go-to solution for low-complexity unattended environments.”*

*“By combining EBS and Logos, we believe we can take this success to the next level – accelerating growth both in our current markets and into new territories across the Nordics. There's still enormous potential to scale, and together we're far better positioned to capture it.”*

With this acquisition, Logos also plans to bring its next-generation Logos All-in-One platform to Norway and Finland, using EBS's strong local presence and deep customer relationships as a launchpad.

*“We see tremendous opportunity in using the reach and reputation of EBS to introduce our new All-in-One platform to more advanced and demanding industries,”* Casper adds. *“It's a natural complement to Nayax, opening the door for EBS to serve verticals like **mobility, refueling, EV charging, car wash/care, ticketing, and smart retail** – just to name a few.”*

With Logos and EBS combined, the company now offers a full-spectrum solution – from simple cost-efficient terminals to fully integrated, industrial-grade self-service platforms.

*“Joining forces with Logos is a natural next step for EBS. We've always been driven by a desire to make unattended payments simple, accessible, and rock-solid for operators in the field.”*

*With Logos, we gain access to new technologies, more advanced verticals, and a partner that shares our commitment to excellence. We're excited for what's ahead – both for our team and for our customers.”* says Geir Ledsten, CEO of EBS Digital.

## **A shared culture and Values**

Beyond the technology and market fit, this is a partnership built on a shared mindset. Both companies bring a deep understanding of unattended payments and a hands-on, customer-first culture.

*“We're extremely excited to welcome the EBS team into the Logos family,”* says Casper. *“They consistently go the extra mile to deliver value in the field. Like us, they care deeply about doing things right – not just on paper, but in real-world, complex unattended environments where performance and reliability matters.”*

This acquisition isn't just about scale. It's about creating a company that is greater than the sum of its parts – capable of reshaping the unattended payment experience across the Nordics and beyond.

We are super excited to get started and can't wait to build the future together.
